

SOL POWER GENERATORS

CLEAN POWER

You can feel great about owning a Sol Power Generator! Using solar power, a renewable energy source, is friendly to the environment and does not burn fossil fuels!

SILENT POWER

An easy way to provide immediate power for your family that is totally silent. If you have weathered a prolonged power outage, you know exactly how important that is. Sol Power Generators are great for everyday use without bothering your neighbors!

PORTABLE POWER

A Sol Power portable solar generator system does NOT require any permanent installation to your home, so you can take it with you when you move! It can be used anywhere.. anytime!!

When not using for portable activities, plugging in your garage appliances will save on your monthly power bill!

Portable Solar Back Up Power

The Sol Power 3000 is a portable solar powered generator that is perfect for home backup power, hurricane relief, outdoor events and much more! Powerful enough to run just about anything in your home, you will feel secure in knowing that you are covered in a power outage, without ever needing gas or fuel ever! Simply throw the included solar panels in the sun to recharge the internal batteries. Sol Power Generator owners enjoy free renewable energy for the life of the generator!

The Sol Power 3000 Solar Generator comes with a powerful 3000/6000 watt pure sine wave inverter and will power sensitive electronics such as laptops, cell phones and medical equipment. It comes standard with 400 watts of fold-able solar panels to charge the batteries. Additional solar panels are available for faster charging times and batteries for longer continuous runtime. Comes with 120VAC, 12V DC, and USB ports to power almost anything in your home or on your work site.

Just **\$3995**

The Sol Power 3000 solar powered generator is equipped with 270° lighting to brighten up any indoor or outdoor spaces!
